Purpose Statement

- ▶ Objective: Using Fitbit data to identify wellness trends and marketing opportunities for Bellabeat Leaf.

Tell Your Story

- ▶ The analysis uses Fitbit Fitness Tracker Data from Kaggle/Mobius
 - ▶ This is a public dataset.
 - ▶ There are approximately 30 Fitbit users.
 - ▶ The dataset: activity, sleep, calorie, and heart rate data.
 - ▶ Limitations: small sample, old data, no demographics

Key Finding 1: Users are Highly Sedentary

- ▶ Users average around 16.5 sedentary hours per day.
- ▶ Marketing implication: promote Leaf as a gentle movement reminder.

Key Finding 2: Users Fall Below Recommended Activity Levels

- ▶ Users are active but often do not reach common activity goals
- ▶ Average Daily Steps was 7,683 compared to the 10,000 step benchmark
- ▶ Marketing implication: promote daily step goals, weekly challenges, and progress tracking

Key Finding 3: Most Activity Is Light Activity

- ▶ Users spend more time in light activity than moderate or intense activity
- ▶ Interpretation: Consumers are not looking to become elite athletes
- ▶ Marketing implication: position Leaf as a realistic wellness tracker for everyday routines

Key Finding 4: Steps and Calories Are Related

- ▶ Higher steps generally correspond with higher calories burned
- ▶ Marketing implication: use progress-based messages and weekly wellness summaries

Key Finding 5: Sleep Tracking Has Opportunity

- ▶ Fewer users track sleep than activity, and many records fall below seven hours
- ▶ Marketing implication: promote sleep insights and bedtime habit education

Conclusion

- ▶ Recommendations
 - ▶ Position Leaf as a daily wellness companion
 - ▶ Create movement and habit-building campaigns
 - ▶ Promote sleep and recovery insights
- ▶ Next steps:
 - ▶ Analyze Bellabeat app data
 - ▶ Collect demographic data
 - ▶ Study customer retention
 - ▶ Test campaign performance
